Dimitry Lyomin

Front-End Developer

E-mail: leminds@gmail.com

Github: github.com/lemind

Summary

I'm a Front-End Developer. I create, maintain and release applications. I write SOLID and readable code, which is a pleasure to work with. I think that persistently following basic principles like DRY and KISS is profitable for a team and a business in the long run. I aim to develop features with a clear understanding of business needs and at the same time to not allow the tech debt to ramp up which would bog down the further development. I catch UX flaws, the cases that have become way too tangled and I am eager to make the user's experience seamless and friendly. I am keen to give a clear understanding as to where a user is in the process and what is needed to achieve a goal.

Work Experience

Newton Technology December 2023 - Present

Senior Front-End Developer
Tech stack: TS, React, React-Native, TanStack Query, Jest
Field: Trading
App: Trading broker
Main responsibilities:
- Develop, maintain and test the app
- Participate in improving develope flow

Major achievements:
- Participate in creating adaptive app part
- Participate in code base refactoring
